1 Year Warranty

SPECIAL FEATURES

- Open Grab-and-Go Access**
 The horizontal air curtain design allows customers to reach merchandise without opening doors, supporting faster service in busy retail and food service settings.
- Stable Cold Holding**
 Ventilated refrigeration circulates air throughout the cabinet, maintaining a consistent temperature range of 30.2 to 44.6 degrees Fahrenheit across all display levels.
- Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm the unit meets recognized safety, sanitation, and energy efficiency requirements for food handling environments.
- Generous Display Capacity**
 The 20.1 cu ft interior accommodates a wide range of refrigerated items, reducing the frequency of restocking during peak service hours.
- Low-GWP Refrigerant**
 R-290 refrigerant has a low global warming potential compared to traditional refrigerants, aligning with current environmental standards for commercial kitchen equipment.
- Flexible Floor Placement**
 Leg levelers and the freestanding installation type allow the merchandiser to be positioned and leveled on various floor surfaces without permanent mounting.

PRODUCT OVERVIEW

The Frigomax Series horizontal air curtain merchandiser is a freestanding open-front display unit suited for convenience stores, delis, supermarkets, and high-traffic commercial kitchen environments where refrigerated grab-and-go access is essential.

The unit holds 20.1 cubic feet of product and operates within a temperature range of 30.2 to 44.6 degrees Fahrenheit, making it suitable for dairy, beverages, deli items, and other perishables that require consistent cold holding. Ventilated refrigeration distributes air evenly throughout the cabinet to support stable temperature across all shelf levels.

At 59.1 inches wide, 27.6 inches deep, and 54.9 inches tall, the merchandiser fits into standard retail floor layouts without requiring a permanent installation. The round side panel shape and leg levelers allow for easy positioning on uneven flooring surfaces. The unit runs on 110V/60Hz power and draws 22.8 amperes.

The Frigomax Series merchandiser uses R-290 refrigerant, a hydrocarbon refrigerant with a low global warming potential. It carries ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications, meeting current energy and sanitation standards for commercial food handling operations. A 1-year warranty is included.
