(Model: FRMD52A)

★★★★★ (4.7/5)

**Buy Now**

**WARRANTY**

**1 Year Warranty**

### SPECIAL FEATURES

- Wide Display Face**  
 At 51.8" wide, the open multideck presents a broad merchandising surface that accommodates multiple product rows, reducing how often staff need to restock during a busy shift.
- Energy-Efficient Refrigerant**  
 R290 refrigerant operates at 940 watts, a lower-draw profile that aligns with commercial kitchen energy management goals and meets DOE Compliance standards.
- Stable Freestanding Setup**  
 Adjustable leg levelers allow the unit to sit level on uneven floors found in many commercial kitchen and retail spaces, reducing vibration and potential service calls.
- Open-Access Shopping**  
 The air curtain cooling system keeps the 36.1 cu ft cabinet at 30°F–45°F without doors, so customers and kitchen staff retrieve items quickly without handle contact or door delays.
- Certified for Food Safety**  
 ETL Sanitation Listed certification confirms the unit meets food-zone hygiene requirements, a key consideration for any restaurant or deli displaying ready-to-eat items.
- 1-Year Warranty Coverage**  
 The included 1-year warranty provides a defined service window, giving buyers a clear support period after installation in a commercial kitchen or retail setting.

## PRODUCT OVERVIEW

The Frigomax Series Vertical Air Curtain Merchandiser is an open multideck display unit designed for grocery stores, convenience stores, delis, and high-traffic commercial kitchen retail environments where accessible cold storage and strong product visibility are priorities.

This freestanding American Style Open Multideck holds 36.1 cubic feet of refrigerated stock and maintains a temperature range of 30°F to 45°F, making it well suited for beverages, dairy, deli items, and prepared foods. The unit measures 31.5" (L) x 51.8" (W) x 78.7" (H), offering a wide display face without requiring a back-room footprint that disrupts kitchen or sales floor layout.

Powered at 110V/60Hz and drawing 20.1 amps at 940 watts, the merchandiser uses R290 refrigerant a low global-warming-potential option and employs an air curtain cooling system that keeps products at temperature while leaving the display fully open for customer access. Leg levelers allow stable placement on uneven flooring common in older commercial kitchen and retail installations.

The unit carries ETL Listed, ETL Sanitation Listed, and DOE Compliant certifications, confirming it meets electrical safety, food-zone sanitation, and federal energy efficiency standards. It is sold as a single freestanding unit and backed by a 1-year warranty.
