1 Year Warranty

SPECIAL FEATURES

- ✓ **Clear Product Visibility**
The full swing glass door lets staff and customers view refrigerated contents at a glance, reducing unnecessary door openings on the commercial floor.

✓ **Consistent Cold Holding**
Electronic temperature control maintains the cabinet between 33°F and 41°F, keeping dairy, beverages, and prepared foods within safe commercial food-handling ranges.

✓ **Low-Impact Refrigerant**
R-290 refrigerant offers a low global warming potential, aligning the unit with current commercial kitchen sustainability and regulatory considerations.
- ✓ **Flexible Shelf Layout**
Four adjustable heavy-duty epoxy-coated shelves accommodate items of different heights, allowing the 18 cu ft interior to be reorganized as stock needs change.

✓ **Dual ETL Certification**
ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation standards required in commercial kitchen and foodservice environments.

✓ **Covered by Warranty**
The Frigomax Series merchandiser refrigerator is backed by a 1-Year Warranty, giving buyers a defined service coverage period from the date of purchase.

PRODUCT OVERVIEW

The Frigomax Series upright glass door merchandiser refrigerator is a freestanding, single-section chiller designed for commercial kitchens, convenience stores, cafes, and restaurant front-of-house areas where visible refrigerated display is needed.

The unit holds 18 cubic feet of storage across four adjustable heavy-duty epoxy-coated shelves, giving operators the flexibility to configure interior space around products of varying heights. The right-hinged swing glass door allows customers and staff clear visibility of refrigerated contents without opening the cabinet. At 30½" (W) x 30" (D) x 74½" (H), the slim footprint fits within compact service areas or along retail walls.

Temperature is maintained between 33°F and 41°F through an electronic temperature control system, suited to dairy, beverages, and prepared foods that require consistent cold-chain conditions. The refrigerant used is R-290, a low-global-warming-potential refrigerant common in modern commercial refrigeration. Interior LED lighting illuminates displayed items clearly while drawing low power at 2.0 amps, 115V, 60Hz, single-phase, via a standard NEMA 5-15P plug.

The exterior is constructed from coated steel with an aluminum alloy frame rail, providing a durable finish for commercial kitchen and retail environments. A keyed lock is included with the unit, securing contents when the unit is unattended. This merchandiser carries ETL Listed and ETL Sanitation Listed certifications and is backed by a 1-Year Warranty.
