- ✓ **Fast Ice Production**
Produces up to 182 ice cubes in 10–15 minutes for commercial beverage service applications.
- ✓ **Adjustable Thickness**
Adjustable ice cube thickness settings support different beverage and food handling requirements.
- ✓ **Cleaning Function**
Automatic self-cleaning functionality supports routine maintenance in restaurant environments.

PRODUCT OVERVIEW

The ChefPro Series Ice Maker Machine is a freestanding electric ice production unit designed for bars, cafes, restaurants, and commercial foodservice operations. It produces cube ice with a maximum daily production capacity of 500 lb. The unit produces up to 182 ice cubes in 10–15 minutes for beverage and food handling applications.

The ice maker features stainless steel construction with a silver finish suitable for commercial kitchen environments. It measures 22.3" (W) x 33.5" (D) x 65" (H). The unit includes a 350 lb bin storage capacity for bulk ice holding during restaurant and cafe operations.

This air-cooled ice maker operates with 1200 W power and 120 V electrical connection. It uses R-600a refrigerant and includes adjustable ice cube thickness settings for different serving requirements. The LCD touchscreen and smart control panel support operational monitoring in commercial kitchens.

The machine includes automatic self-cleaning functionality and up to 8 hours ice preservation timer support. It is supplied with an ice scoop and ice basket for foodservice use. The freestanding unit operates on electric power and includes a 1-year warranty by the manufacturer.
