WARRANTY

10-Year Panel, 1-Year Door Parts, 2-Year Compressor & Parts, 1-Year Labor on Refrigeration Unit

SPECIAL FEATURES

- Galvanized Steel Build**
 White galvanized steel construction supports commercial kitchen refrigeration environments with daily use.
- Polyurethane Insulation**
 4-inch insulation with R-28 thermal resistance supports temperature retention inside the cooler.
- R-448A Refrigerant**
 R-448A refrigerant supports operation within the top-mounted refrigeration system design.
- Cam-Lock Panel System**
 Modular cam-lock and tongue-and-groove design supports structured panel assembly.
- Self-Closing Door Design**
 Flush-mounted self-closing door supports repeated access in restaurant workflows.
- Extended Storage Layout**
 Nominal dimensions of 8 ft x 30 ft provide long-format refrigerated storage for restaurant operations.
- Top Mounted Cooling**
 Top-mounted refrigeration system positions compressor above the storage area for integrated cooling.
- Complete Refrigeration Setup**
 The unit includes a condensing unit and evaporator for commercial installation requirements.
- Secure Door Access**
 Solid swing door with keyed lock supports restricted access in food storage environments.
- Warranty Coverage**
 Includes a 10-year panel warranty and additional compressor, parts, door, and labor coverage.

PRODUCT OVERVIEW

The PolarBox Series Walk-In Cooler is designed for commercial kitchen operations, restaurants, and refrigerated food storage applications. It features white galvanized steel construction for daily foodservice environments. The unit measures 98" (L) x 354" (W) x 87" (H), with a nominal size of 8 ft width, 30 ft depth, and 7 ft height, supporting long-format cold storage layouts.

This walk-in cooler includes 4-inch polyurethane insulation with an R-28 thermal resistance rating to support refrigerated storage conditions. The insulation material is CFC and HFC free and combined with 24-gauge steel panels. A modular cam-lock and tongue-and-groove hinge system supports structured panel assembly in commercial refrigeration installations.

The refrigeration system uses a top-mounted configuration with R-448A refrigerant. It operates on 208/230 V, 60 Hz, single-phase electrical service with a hardwired connection. The system places the compressor above the storage compartment for integrated cooling performance in commercial kitchen setups.

This model includes a solid swing door with a 77-inch height, self-closing operation, and flush-mounted design. A keyed lock supports controlled access in food handling areas. The unit is designed without a floor and supports indoor and outdoor usage. It includes UL Listed US, NSF Listed, and DOE certifications along with a 10-year panel warranty, 1-year door parts warranty, 2-year compressor and parts warranty, and 1-year labor warranty on the refrigeration unit.
