WARRANTY
1 Year Warranty

SPECIAL FEATURES

- Two Zones, One Unit**
 The dual temperature chiller/freezer configuration lets a restaurant or retailer display both refrigerated and frozen items side by side without occupying two separate floor footprints.
- Low-GWP Refrigerant**
 R-290 refrigerant is a natural, low global-warming-potential option that aligns with increasingly strict environmental regulations in commercial food retail and kitchen settings.
- Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm the unit meets recognized safety, sanitation, and energy efficiency requirements for commercial kitchen environments.
- Full-Length Display**
 At 78.7 inches wide, this island merchandiser offers a long, open display run that accommodates a broad selection of packaged foods, beverages, or prepared items for high-traffic service.
- Automatic Defrost Cycle**
 The built-in automatic defrost system reduces the need for manual defrost intervals, keeping staff focused on food handling and customer service rather than equipment maintenance.
- Stable, Level Installation**
 Adjustable leg levelers allow the merchandiser to sit flat on uneven flooring common in commercial kitchens and retail spaces, reducing vibration and improving long-term stability.

PRODUCT OVERVIEW

The Frigomax Series dual temperature island air curtain merchandiser is built for retail and commercial kitchen environments where open-display refrigeration is needed for both chilled and frozen items in a single freestanding unit.

This unit spans 78.7 inches wide, 37.4 inches deep, and 36.2 inches tall, making it a full-length island display suited for grocery stores, convenience stores, delis, and high-traffic food service operations. The 14.5 cubic foot interior accommodates a meaningful product load across both temperature zones without requiring additional floor units.

The display case operates across a temperature range of -0.4 to -8 degrees Fahrenheit and runs on 110V at 60Hz, drawing 21.9 amperes at a wattage of 1050/500 watts depending on the active zone. Refrigeration is handled by R-290 refrigerant, a low-GWP natural refrigerant, distributed via fan cooling for consistent temperature across the cabinet. Automatic defrost reduces manual maintenance requirements during daily operations.

Leg levelers allow the unit to sit level on uneven commercial kitchen or retail floors, and the front glass panel keeps displayed items visible to customers at all times. The unit is ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant, meeting key commercial food safety and energy standards. A 1-year warranty is included with purchase.
