SPECIAL FEATURES

- Open-Front Display Access**
 The vertical air curtain design allows customers and staff to access chilled items without opening a door, supporting faster service flow in grab-and-go and cafeteria settings.
- Dual-Level LED Visibility**
 Interior cabinet LED lighting combined with under-shelf LED lighting illuminates items from multiple angles, making displayed food and drink easier for customers to see and select.
- Triple Certification Coverage**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm the unit meets recognized electrical safety, sanitation, and federal energy efficiency standards for commercial use.
- Consistent Cold Holding**
 Ventilated cooling paired with a 30.2 to 44.6 degree Fahrenheit temperature range keeps beverages, dairy, and packaged foods within safe cold-holding limits across all shelves.
- Lower-GWP Refrigerant**
 R-290 refrigerant is a hydrocarbon with a significantly lower global warming potential than legacy refrigerants, aligning with current environmental considerations in commercial kitchen procurement.
- Included One-Year Coverage**
 The 1-Year Warranty provides documented coverage from the point of purchase, giving restaurant operators and food service buyers a defined service period for this merchandiser.

PRODUCT OVERVIEW

The Frigomax Series Vertical Air Curtain Merchandiser is a freestanding open-front refrigerated display unit suited for retail counters, cafeterias, grab-and-go stations, and convenience-oriented commercial kitchens where customer-facing cold food display is a priority.

The cabinet holds 21.5 cubic feet of refrigerated space and maintains a temperature range of 30.2 to 44.6 degrees Fahrenheit, making it appropriate for beverages, dairy, deli items, and pre-packaged foods. Ventilated cooling circulates air throughout the interior to maintain consistent temperatures across all shelf levels. The unit runs on 110V at 60 Hz, draws 17.4 amperes, and operates at 950 watts.

Interior LED cabinet lighting and under-shelf LED lighting illuminate displayed items from above and below, improving product visibility for customers without creating additional heat load. The unit measures 35.6" (L) x 52.4" (W) x 59.1" (H) and stands on adjustable leg levelers that allow the unit to be leveled on uneven commercial kitchen floors.

The Frigomax Series merchandiser uses R-290 refrigerant, a low-GWP hydrocarbon refrigerant increasingly adopted in commercial kitchen equipment for its reduced environmental impact. The unit carries ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications, confirming it meets established electrical safety, sanitation, and energy efficiency standards. A 1-Year Warranty is included.
