- ✓ **High Output Rate**
Produces 60+ cups per hour, aligning with beverage service and food handling needs.
- ✓ **Durable Tank Build**
Stainless steel tank with brass and copper components supports structured use in commercial kitchens.
- ✓ **Warranty Coverage**
It includes a 1-year warranty by the manufacturer, defining coverage for commercial kitchen use.

PRODUCT OVERVIEW

The ChefPro Series Hot Water Dispenser is designed for commercial kitchen and beverage service operations requiring a compact hot water supply. It features a combination of brass, copper, and stainless steel construction with a silver finish, supporting structured use. The unit measures 6.3" (W) x 6.7" (D) x 10.7" (H), aligning with under sink installation and wall mount compatibility. It operates on 110 V electric power with 60 Hz and a wattage of 1300 W.

This hot water dispenser has a capacity of 2.5 qt, supporting continuous hot water access in commercial kitchen environments. It delivers an output of 60+ cups per hour, aligning with food service requirements. The unit operates within a temperature range of 140°F to 200°F, with manual temperature control and an adjustable knob for operational settings.

The unit includes a single-lever brushed nickel faucet, supporting controlled water dispensing in restaurant setups. It features 3 programmed settings, aligning with structured operation. The tank is made of stainless steel, supporting internal durability during use.

This unit features a bottom access design, supporting maintenance and accessibility. It is designed for under sink installation with wall mount compatibility, aligning with space management in commercial kitchens. It includes a 1-year warranty by the manufacturer, defining coverage terms for commercial use.
