1 Year Limited Warranty

SPECIAL FEATURES

- ✓ Compact Display**
 Designed for countertop use, it fits commercial kitchens with limited space while providing visible storage for prepared foods.
- ✓ Temperature Control**
 Thermostatic control maintains temperatures from 35.6°F to 53.6°F, suitable for cold storage of perishable ingredients.
- ✓ Certified Safety**
 ETL Certified and includes a 1-year warranty, meeting standard safety requirements for commercial kitchen equipment.
- ✓ Adjustable Shelves**
 Three shelves allow flexible organization of food items in restaurants and cafes, supporting efficient food handling.
- ✓ LED Illumination**
 Interior LED lighting highlights displayed food items, aiding chefs and staff in menu presentation and selection.

PRODUCT OVERVIEW

The ChefPro Series Countertop Refrigerated Display Refrigerator is designed for restaurants, cafes, and commercial kitchens requiring a compact refrigerated display solution. It is constructed from stainless steel with a black and silver finish, supporting durable food handling in high-traffic areas. The unit features an up-style glass door with thermostatic temperature control, allowing operators to adjust and maintain temperatures between 35.6°F to 53.6°F.

It includes three adjustable shelves for organized food display and storage. LED lighting illuminates the interior, improving product visibility for chefs and staff. The refrigerator operates on a single-phase 120 V power supply and consumes 240 W, using a standard NEMA 5-15P plug type.

It is freestanding for flexible placement on countertops. The dimensions are 27.1" (W) x 22.6" (D) x 27.8" (H), and the unit weighs 125.7 lb. It is ETL Certified for safety and includes a 1-year warranty by the manufacturer.
