WARRANTY

1 Year Limited Warranty

SPECIAL FEATURES

- High Capacity**
 Dual 15L bowls serve over 84 cups per cycle, ideal for busy commercial kitchens and beverage stations.
- Consistent Mixing**
 360° mixing slushy machine design ensures smooth and uniform slushy texture in both bowls.
- Easy Access**
 Two taps and two lids allow efficient serving and quick refill.
- Versatile Use**
 Supports slushies, cold brew coffee, teas, fresh juices, and other cold beverages.
- Warranty Support**
 1-year limited manufacturer warranty ensures reliable operation of this ChefPro Series slushy machine.
- Durable Construction**
 Stainless steel/ABS body and polycarbonate bowls withstand daily use in commercial slushy machine environments.
- Digital Control**
 Electronic controls and preset programs simplify operation and beverage preparation.
- Portable Design**
 Detachable drip trays and compact counter-top size support flexible placement.
- Visual Appeal**
 4-color LED lighting enhances beverage presentation and customer engagement.

PRODUCT OVERVIEW

The ChefPro Series **CP30LSM** 30L Dual Bowl Slushy Machine is a commercial slushy machine designed for high-volume beverage service in restaurants, cafes, and foodservice operations. Constructed with stainless steel and ABS plastic and featuring polycarbonate bowls, this slushy machine combines durability with efficient beverage preparation.

Overall dimensions are 18.7" (W) x 18.9" (D) x 32.1" (H), making it suitable for counter-top placement. This unit operates at 1000 W and features a **360° mixing slushy machine** mechanism with dual screw augers for consistent mixing in both bowls. Digital/electronic controls with a temperature control knob allow settings between 55°F and 77°F. This unit comes with a 1-year limited warranty and weighs 131.7 lb.

Dual Bowl Slushy Machine Features

The machine includes two taps, two lids, and two detachable drip trays for convenient service and cleanup. The **dual bowl slushy machine** serves over 84 cups per cycle and includes three preset programs for different beverage types, including cold brew coffee, teas, and fresh juices. A 4-color LED light provides visual appeal, and the air-cooled compressor ensures reliable cold operation.
