SPECIAL FEATURES

- Clear Product Visibility**
 The single glass door allows staff and customers to view all stored items at a glance without opening the unit, reducing cold air loss during busy service periods.
- Narrow Floor Footprint**
 At 23 3/8" wide, this upright freezer fits into tight commercial kitchen or retail floor spaces where wider units would not be practical.
- ETL Certified for Food**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation standards applicable in commercial food handling environments.
- Flexible Interior Layout**
 Four adjustable shelves let kitchen or retail staff reconfigure storage height to accommodate products of different sizes between restocks.
- Standard Electrical Compatibility**
 Running at 115V/60Hz on a NEMA 5-15P plug at 3.3 amperes, this freezer connects to a standard commercial circuit without requiring dedicated electrical installation.
- Included Coverage**
 A 1-year warranty is included with each unit, providing a defined period of coverage for a commercial kitchen's purchasing and budgeting records.

PRODUCT OVERVIEW

The Frigomax Upright Ventilated Freezer Glass Door Series is a single-door glass door merchandising freezer designed for commercial kitchens, convenience stores, restaurants, and retail food service operations that need reliable frozen product display in a compact footprint.

This unit holds 10.4 cubic feet of frozen goods across 4 adjustable shelves, allowing staff to configure interior storage to fit items of varying heights. The freezer maintains a temperature range of -8°F to 0°F, keeping frozen foods at a consistent deep-freeze level suitable for commercial food handling requirements. The left-hinged glass door provides clear product visibility without opening the cabinet, which supports both front-of-house display and back-of-house storage roles.

The cabinet is constructed from coated steel and measures 26 1/8" (D) x 23 3/8" (W) x 74 1/8" (H), making it a narrow upright option that fits into tight kitchen or retail floor layouts. Electronic controls allow staff to set and monitor temperature settings with straightforward adjustments. A key lock adds a basic level of access control to the unit. Interior LED lighting illuminates stored items clearly for both staff and customers.

The freezer runs on 115V/60Hz single-phase power through a NEMA 5-15P plug, drawing 3.3 amperes at 1/3 horsepower, which keeps it compatible with standard commercial kitchen electrical circuits without requiring dedicated wiring. The unit uses R-290 refrigerant and carries ETL Listed and ETL Sanitation Listed certifications. A 1-year warranty is included with purchase.
