1 Year Warranty

SPECIAL FEATURES

- High-Capacity Display**
 The 50.8 cu ft interior holds a large assortment of refrigerated items, reducing how often staff need to restock during peak service hours.
- Precise Temperature Hold**
 A 30°F to 45°F operating range keeps perishables within safe food handling temperatures throughout the holding period.
- Dual LED Illumination**
 LED interior cabinet lighting combined with under-shelf LED lighting keeps every shelf level clearly lit, improving product visibility for customers on a busy retail or restaurant floor.
- Open Access Design**
 The vertical air curtain format eliminates doors, allowing customers and kitchen staff to retrieve items quickly without breaking the cold airflow barrier.
- Energy-Efficient Refrigerant**
 R290 refrigerant has a low global warming potential, supporting the DOE Compliant rating and reducing the unit's environmental footprint in a commercial kitchen setting.
- Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE Compliant certifications confirm the unit meets established safety, sanitation, and energy standards required for commercial food handling environments.

PRODUCT OVERVIEW

The Frigomax Series Vertical Air Curtain Merchandiser is a European-style open multideck unit designed for retail and foodservice environments such as grocery stores, delis, convenience stores, and restaurant grab-and-go sections where visible, accessible cold storage drives sales.

With a 50.8 cubic foot capacity and a freestanding footprint measuring 31.5" (D) x 59.8" (W) x 78.7" (H), this merchandiser accommodates a substantial volume of refrigerated product across its vertical display space. The open multideck air curtain design maintains a temperature range of 30°F to 45°F, keeping perishables within safe holding temperatures without physical doors that slow customer access.

The unit operates on 110V / 60Hz and draws 28 amperes at 1,650 watts, making electrical planning straightforward for standard commercial kitchen or retail floor installations. It uses R290 refrigerant, which carries a low global warming potential and aligns with modern energy and environmental standards. LED interior cabinet lighting and under-shelf LED lighting illuminate displayed items clearly, supporting product visibility on the retail floor.

Adjustable leg levelers allow stable placement on uneven surfaces, and the black finish integrates cleanly into modern retail and commercial kitchen display layouts. The merchandiser is ETL Listed, ETL Sanitation Listed, and DOE Compliant, meeting recognized performance and sanitation benchmarks for commercial food handling applications.
