BICOCCA

Bold architecture, pro-level performance engineered for the most discerning coffee connoisseur.

A fusion of cutting-edge engineering, premium materials and a design aesthetic that commands attention. With dual stainless-steel boilers, a touchscreen HMI interface and modular servicing architecture, the Bicocca is built for those who demand exceptional extraction control, unwavering stability and standout presence in their space.

Designed and handcrafted in Milan, it delivers uncompromising performance for both the serious home barista and boutique location.
