Supports smoothies, nut milk, soups, baby food, and protein shakes.
- ✓ **Variable Speed Control**
10 speed settings with manual knob control support recipe adjustment.
- ✓ **Certified Standards**
ETL certification aligns with commercial kitchen electrical requirements.

PRODUCT OVERVIEW

The ChefPro Series vacuum blender is designed for restaurants, beverage stations, and commercial kitchen preparation areas requiring high-speed blending for smoothies, soups, and beverages. It is constructed from ABS plastic and metal with a carbon black finish. The unit measures 7.83" (L) x 10.51" (W) x 20" (H) and features a quiet shield design for countertop use.

This blender operates with a Japanese Fuji carbon pure copper motor rated at 4 HP with 3000 W motor wattage and 1500 W operating wattage. It reaches speeds up to 40000 RPM and includes 10 speed settings with manual knob controls. The unit supports smoothies, nut milk, hot soup, baby food, and protein shake preparation.

The blender includes a 56 oz Eastman Tritan BPA-free cup with a 3.5 lb capacity. It features 4-turbine wall stainless steel blades, -75kPa vacuum technology, and a non-stop operation design. Safety features include a smart memory function, lid safety lock, and self-clean dishwasher-safe components.

Included accessories are a motor base, vacuum main cup lid, non-vacuum main cup lid, non-vacuum feeding lid, ABS stirring stick, silicone scraper, and cleaning brush. It operates on 120 V electric DC power and is cETL certified. It includes a 5-year limited warranty by the manufacturer.
