Production output of 220 to 265 lbs/hr supports continuous juice extraction in commercial kitchens and juice bars.
- ✓ **Continuous Operation**
Continuous juice production supports commercial kitchen workflows for fruits and vegetables.
- ✓ **Certified Equipment**
CE Certified construction supports commercial foodservice operational requirements.
- ✓ **Dual Material Build**
Cast aluminum and stainless steel construction supports structured operation in foodservice environments.
- ✓ **Automatic Pulp Removal**
Automatic pulp extractor supports separation of juice and pulp during beverage preparation.
- ✓ **Warranty Coverage**
It includes a 1 year warranty by the manufacturer.

PRODUCT OVERVIEW

The ProKitchen Series Electric Juice Extractor is designed for commercial kitchens, juice bars, cafés, and foodservice operations requiring continuous juice extraction. Built with cast aluminum and stainless steel in a silver finish, it supports structured juice production workflows. The unit measures 16.9" (L) x 13.8" (W) x 17.7" (H) and operates with a 3/4 HP motor at 2800 RPM for commercial juice extraction tasks.

The ProKitchen Series Electric Juice Extractor operates on 110 V, 60 Hz, single-phase electric supply with 550 W power and NEMA 5-15P plug type. It delivers a capacity of 220 to 265 lbs/hr for continuous juice production in commercial kitchen environments. The unit is configured for juice extraction from both fruits and vegetables with continuous operation support.

The ProKitchen Series Electric Juice Extractor includes a 4.25" chute length with a 3" x 2" mouth opening size for food loading in commercial foodservice settings. It features an automatic pulp extractor system and stainless steel motor shaft for structured juice separation. The juice spout supports 6 or 8 different position locations for dispensing flexibility in beverage preparation workflows.

The ProKitchen Series Electric Juice Extractor is CE Certified and includes a 1 year warranty by the manufacturer. It features a toggle power button and 72-inch power cord length for installation in commercial kitchen layouts. The unit is designed for quiet operation and supports continuous juice production in foodservice environments.
