SPECIAL FEATURES

- ✓ Nine-Pan Capacity**
 Fitting nine GN 1/3 pans in a single unit gives a busy sandwich or salad station enough variety to cover a full service without mid-shift restocking.
- ✓ Minimal Counter Footprint**
 At 78 3/4" long and only 15 1/2" deep, the unit sits along a prep line without consuming significant counter depth, leaving room for other prep tasks.
- ✓ Dual ETL Certification**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized electrical safety and food-contact sanitation standards relevant to commercial food service operations.
- ✓ Precise Cold Holding**
 Electronic temperature control holds the cabinet between 33°F and 41°F, keeping perishable condiments and garnishes within the safe cold-holding range required in a commercial kitchen.
- ✓ Standard Outlet Compatible**
 The NEMA 5-15P plug and 1.4-ampere draw mean the unit connects to a standard 115V commercial kitchen outlet with no dedicated circuit or rewiring needed.
- ✓ Eco-Conscious Refrigerant**
 R-290 refrigerant combined with CFC-free foam insulation aligns the unit with current environmental refrigerant standards, a consideration for operators managing sustainability compliance.

PRODUCT OVERVIEW

The Frigomax Series Refrigerated Countertop Condiment Holder is a 9-compartment prep unit designed for restaurants, delis, sandwich stations, and other commercial kitchen environments that need chilled toppings and ingredients within easy reach during service.

The unit holds nine GN 1/3 pans and maintains a temperature range of 33°F to 41°F, keeping perishable condiments, sauces, and garnishes at safe holding temperatures throughout a shift. Electronic temperature control allows kitchen staff to monitor and adjust settings precisely without manual guesswork.

Built from stainless steel with a silver finish, the 78 3/4" (L) x 15 1/2" (D) x 17 1/8" (H) countertop footprint fits along prep lines or service counters without requiring floor space. The unit runs on 115V/60Hz single-phase power with a NEMA 5-15P plug, drawing just 1.4 amperes from a standard outlet, and is powered by a 1/5 HP compressor using R-290 refrigerant.

The insulation uses CFC-free foaming, and the unit carries ETL Listed and ETL Sanitation Listed certifications, confirming it meets established commercial food safety and electrical safety standards. A 1-year warranty is included with each unit.
