WARRANTY

Parts & Labor: 2 Years

Compressor: 6 Year

SPECIAL FEATURES

- ✓ **High Output**
Produces 350 lb of cube ice within 24 hours for steady restaurant and commercial kitchen demand.
- ✓ **Fast Batches**
Forms 156 cubes in 15–18 minutes per batch to support beverage stations and food handling cycles.
- ✓ **Digital Operation**
LED digital display with digital control, self check, and status indication for monitored operation.
- ✓ **Maintenance Access**
Removable front dust filter and auto clean function support routine cleaning in busy kitchen areas.
- ✓ **Certified Build**
Energy Star, ETL Sanitation, cETLus Listed, and NSF Listed ratings align with commercial compliance needs.
- ✓ **Warranty Coverage**
Includes a 2-year warranty on parts and labor and a 6-year compressor warranty by the manufacturer.

PRODUCT OVERVIEW

The Platinum Frost Series air-cooled ice machine delivers consistent cube ice production for commercial kitchens, cafés, and beverage stations requiring dependable daily output. Built with a durable stainless steel exterior and food-safe polyethylene interior, this compact unit fits tight prep areas while supporting heavy service demands. Its freestanding design and front ventilation allow flexible placement without sacrificing performance or accessibility.

Engineered to produce up to 350 lb of cube ice every 24 hours, the system completes each batch in 15 to 18 minutes, yielding 156 uniform cubes. The air-cooled condenser maintains steady temperatures while reducing water use and simplifying maintenance. Adjustable 3 mm ice thickness provides control over cube density, making the machine suitable for drinks, displays, and general foodservice applications.

A bright LED digital display with electronic controls supports clear monitoring and simple operation. Built-in diagnostic sensors, self-check mode, auto clean, countdown timing, and status indicators streamline daily management and reduce service interruptions. The removable front dust filter allows quick cleaning to maintain airflow and efficiency, helping the machine operate reliably during long shifts.

Operating on 110–120 V power with a NEMA 6-20P plug, this 1-phase, 1000-watt unit uses eco-friendly R-290 refrigerant and meets Energy Star, ETL Sanitation, cETLus, and NSF certifications. The cabinet retains ice for up to 24 hours during power loss, protecting stored product. Backed by a 2-year parts and labor warranty and 6-year compressor coverage, it supports dependable, long-term performance.
